Education

BVRIT Hyderabad College of Engineering for Women,Hyderabad **6.72 CGPA**
B.Tech in Electrical and Electronics Engineering 2021 -2025

Alphores Junior College,Karimnagar **94.4%**
Class XII 2020-2021

Krishnaveni Talent School,Manthani **9.5 GPA**
Class X 2019-2020

Projects

PS0-FOPI Controller Based Grid Connected Solar PV System:
Designed and simulated a PSO-optimized FOPI controller for a grid-connected solar PV system using MATLAB/Simulink and improved power quality and system stability compared to conventional PI control under varying solar conditions.

Brain Tumor Classification:
Designed and implemented a Telegram-based AI assistant that accepts brain MRI images and classifies tumor types using a convolutional neural network (CNN).
Integrated the deep learning model with the Telegram Bot API to deliver instant, user-friendly tumor detection and classification results.

IoT Based Smart Talking Energy Meter:
This project presents an IoT-based Smart Talking Energy Meter that monitors real-time power consumption. It features voice output for readings and alerts, enhancing user accessibility.

IPL SCORE PREDICTION(Deep learning):
Actively contributed to the deep learning project,and developed a model which predicts the 1st innings scores of IPL team based on historical data in GUI code development.

Technical Skills	Python,Java,JavaScript(Beginner)
Web Technologies	HTML,CSS(Flexbox,Grid)
Databases	SQL
Tools/Version Control	Git,GitHub

Certificates

Artificial Intelligence Fundamentals:
Completed a 6 hour course on Artificial Intelligence Fundamentals by IBM SkillBuild.
Job Simulation in Project Management:
Completed a 4 hour job simulation in Accenture.
Cyber Security Fundamentals:
Completed a 6 hour course on Cyber Security Fundamentals by IBM SkillBuild.
MATLAB-Onramp:
Completed a 2 hour course on MATLAB-Onramp by Mathworks.

Patents

AI Powered Diagnostic Tool for Brain Tumor Classification:
Application No:202541029025 A | Granted:2025
Developed an AI-powered system that integrates a CNN-based brain tumor classifier with a Telegram bot for real-time diagnosis using MRI images

Organising Capabilities

Student Volunteer for the **FIA Formula-E racing**
Student Volunteer for **Future-Solve Hackathon by Pravaha Foundation**
Student Coordinator of **Medhanvesh,Technical Fest(BVRITH)**
