EDUCATION

Chaitanya Bharathi Institute of Technology, Hyderabad M.Tech. - Artificial Intelligence & Data Science CGPA: 8.48 / 10	2023 - 2025
Nalla Malla Reddy Engineering College, Hyderabad B.Tech. - Computer Science & Engineering (Full Time) CGPA : 7.08 / 10	2019 - 2023
trinity junior college, karīmṇagar 12 th TSBIE Percentage: 97.80 / 100	2018
Sri Sai English Medium high School, karīmṇagar 10 th CGPA: 9.30 / 10	2016

PROJECTS

Brain Tumor Detection using CNN Mentor: Kiranmai Team Size: 1 Key Skills: Python Neural Networks Artificial Neural Networks Artificial Intelligence We presented the idea of detecting Brain tumor using Convolutional neural network. The principle objective of this research work is to structure a effectively programmed brain tumor classification with high accuracy, performance low complexity. Another objective is to build up a system to help with brain tumor detection which operates in the same line of work as a physician, considering his experience and knowledge. The system was successful in providing a response as in if the tumor is present or not. The intuition behind implementing this idea was to help the surgeons to precisely detect the presence of a tumor.	28 Mar, 2024 - 27 Jul, 2024
Language Translator Mentor: Shobha Rani Team Size: 1 Key Skills: GUI Python we implemented the system for user who phasing problems of language barrier and also it user interface is also user friendly so that user can easily interact with this system. So it automatically reduces the user task for understanding the languages for communication. Translation is not merely at changing words, but also transferring of cultural equivalence with the culture of the original language and the recipient of that language as well as possible. The better translation must be accepted by all people in logic and based on fact; thus, the message which contained in the source language (SL) can satisfy the target language (TL) reader with the information within. When you understand the importance of translation for everyone, you will be able to see it as a necessary and worthy investment.	25 Jan, 2024 - 20 Feb, 2024
Movie Recommendation using ML Techniques Mentor: Selvamuttu Kumaran Team Size: 4 Key Skills: python Recommender Systems GUI We're trying to find new ways to improve the accuracy of the representation of videos, especially for contextual recommendations. In summary, using content-based filtering, video suggestions can be made using the cosine similarity algorithm, taking into account the user's suggestions, it can improve the user's character names and other games. A successful project is the result of the efforts of many people, some directly involved and others quietly supporting and encouraging
