Training & Internship

Training in Emerging Technologies

Institutions: Edu Net Foundation, SAP, Code Unnati, and TASK

Duration: September 2024 – March 2025

- Areas Covered:** Covered **4 key areas** — Machine Learning, Internet of Things (IoT), SAP ABAP Programming, and Computer Vision.
- Hands-On Skills:** Built and validated **5+ projects** in ML and IoT, applied SAP ABAP programming in **3 real-world scenarios**, and executed **2 computer vision algorithms** for image analysis, achieving **90% accuracy** in object detection.
- Outcome:** Gained proficiency in advanced tech skills, achieving **90%** project completion success

App Developer Intern – CRM Application

Keerthi Bizplus4u IT Services Pvt. Ltd. | March 2025 - Present

- Built** key modules of a CRM mobile app using Flutter and Dart, including dashboard, task manager, and opportunity tracking.

Professional Experience & Projects

[AI Crop Care](#)

Technologies: Flutter , Dart , Raspberry Pi , Deep Learning , MongoDB

- Objective:** Developed an AI-powered crop care system that detects plant diseases with **92%** accuracy, enabling early intervention and optimizing agricultural productivity.
- Key Features:** Enforced machine learning algorithm achieving 92% accuracy in plant disease classification using real-time image processing, enabling farmers to receive early warnings and reduce crop loss by 40%.
- Impact:** Reduced crop disease spread by 40%, enhanced early detection rates by 35%, and provided farmers with instant actionable insights for better crop management.
- GitHub:** [AiCropCare](#)

[Jyothishmathi Mobile Application](#)

Technologies: Flutter, Dart

- Objective:** Engineered a mobile application to centralize **10+** college resources, facilitating real-time communication for **500+** students and offline access for students and faculty.
- Key Features:** Initiated push notifications for **10+** timely announcements, offline access to essential resources, intuitive user interface, and local data storage with CSB for seamless offline functionality.
- Impact:** Redesigned user engagement by **30%** through improved access to real-time updates and reduced reliance on external communication channels by 25%.
- GitHub:** [JyothishmathiMobileApp](#)

PresencePro: Automated Attendance System

Libraries: Flask, OpenCV, Tkinter, MongoDB

- Objective:** Modernized a facial recognition-based automated attendance system that reduced attendance tracking time by **80%**, replacing manual and biometric methods for a **50+ person team**.
- Key Features:** Revitalized secure login with password hashing, real-time attendance capture using OpenCV with **95%** accuracy, data visualization with heatmaps and 7 others techniques, MongoDB for **seamless data management of 50+ entries**, email automation via YAGMAIL, and CSV export for data analysis.
- Impact:** Saved a 40% reduction in time required for attendance processing and a 30% increase in accuracy for attendance records, benefiting both educational institutions and corporate teams.
- GitHub:** [presencepro: Automated Attendance System](#)

Stock Price Prediction Model

Technologies: Python

Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn

- Objective:** Created and achieved a predictive model for stock prices, achieving **an accuracy of 85%** in forecasting price trends by leveraging **5 years of historical data**.
- Techniques:** Employed data preprocessing on **10,000+ data points** and implemented **5** algorithms, including **Linear Regression, Decision Tree, K-Nearest Neighbors, SVR, and Random Forest**, optimizing for **10% lower error rate** compared to baseline models.
- Outcome:** Achieved a 15% improvement in model accuracy by enhancing the R² score through feature engineering and model tuning, providing more reliable predictions.
- GitHub:** [Stock-price-prediction](#)

Achievements

- To showcase India’s excellence in Austin, Texas, USA**, I was **selected among 50 students across India** to represent our **AI Crop Care** project as one of the most impactful real-time solutions for enhancing **sustainable agriculture practices** in the country.
- 2nd Runner-Up** in the **Code Unnati Innovative Marathon 2025** for the **AI Crop Care app**, held at **TASK Head Office, Hyderabad**.
- 1st Prize Winner** in **Hack Vortex**, a national-level hackathon conducted by **SRM University**, for the **AI Crop Care app**.

Education

B. Tech in Computer Science and Engineering (AI & ML)

Jyothishmathi Institute of Technology and Science, JNTUH
Graduation: 2025 | Current CGPA: 8.4

Minor Degree in Data Science

Jawaharlal Nehru Technological University Hyderabad | 2023-2025

Technical Skills

- **Programming Languages & Frameworks:** Python, Dart, SQL, Flask, Flutter,Java
- **Data Science & Machine Learning:** Statistical Analysis, Data Mining, Model Training, Feature Engineering, Model Evaluation (MSE, R²), EDA
- **Libraries & Tools:** Pandas, NumPy, Scikit-Learn, OpenCV, Matplotlib, Seaborn, YAGMAIL, Tkinter, Power BI
- **Database Management:** MongoDB
- **Mobile Development:** Flutter, Dart
- **Embedded Systems & IOT:** Arduino, Raspberry Pi, ESP8266, SIM900A GSM, NEO 6M GPS Module

Certifications

- **CISCO Networking Academy:** Python, Cybersecurity, CCNA7, and Data Analysis.
- **Code Tantra:** Python Programming Course Completion [view certificate](#)
- **IBM:** Getting Started with Enterprise Data & AI.
- **LinkedIn & Microsoft:** Career Essentials in Data Analysis & Generative AI
