

Harshitha Ranjalkar

QA Engineer

✉ harshithasony559@gmail.com ☎ 9182805062 📍 Hyderabad, India

PROFESSIONAL SUMMARY

QA Engineer with 4.5 years of experience in OSS/BSS testing, backend verification, Rating & Billing Management (RBM). Skilled in manual testing, API testing, and defect tracking and experienced in Agile environments, executing test plans, validating system functionality, and collaborating with cross-functional teams to deliver high-quality software

TECHNICAL SKILLS

Telecom & OSS/BSS: OSS/BSS testing, telecom network validation, fault management (SNMP, alarms), UAT & system testing, API testing (Postman, Newman), Kubernetes, Netcracker OSS, service orchestration, resource inventory, network provisioning, performance monitoring

Programming & Databases: Java (OOPs), SQL for backend verification

Automation & Scripting: Selenium WebDriver, Playwright (Python)

Agile & DevOps: Agile methodologies, sprint planning, JIRA, Jenkins

Additional QA Skills: Test planning & execution, defect tracking, regression testing, functional & performance testing, test case design, process improvement

PROFESSIONAL EXPERIENCE

Company: Netcracker Technology

Duration: October 2021 – Present

Project - Telefonica

- Performed end-to-end testing for SIM lifecycle processes: SIM purchasing, activation, deactivation, decommissioning, and replacement workflows.
- Validated VoLTE and LTE service activation, fallback scenarios, and voice/data continuity.
- Executed test cases for mobile data, data roaming, and usage thresholds based on prepaid and postpaid plans.
- Conducted backend validation with PCRF, UDB, and HSS systems to ensure accurate provisioning and service activation.
- Conducted regression and functional testing of the Telefónica self-service portal

Project - Gfiber

- Facilitated end-to-end OSS solution testing, ensuring functionality, performance, and reliability met business requirements.
- Validated components including Network Inventory, Service Provisioning, Fault Management, and Service Assurance for seamless integration and operational efficiency.
- Tested modules such as Service Orchestration, Resource Inventory, and Alarm Correlation to improve fault detection and performance monitoring.
- Integrated OSS with ServiceNow for alarm correlation, ticketing, and automated workflows.
- Hands-on with device setup/configuration (ONT/OLT/BNG) and service provisioning on Nokia AMS (XGSPON/GPON/25GPON) and Altiplano.
- Performed user access and security testing to verify role-based controls and compliance.

Project - Telus

- Executed manual testing in QA cloud environments to ensure software quality.
- Verified backend validations using TOMS server to ensure data integrity.
- Conducted API testing with Postman to validate system functionality.
- Performed end-to-end testing and order provisioning, ensuring synchronization between legacy and cloud portals.
- Managed logs using Kubernetes for efficient debugging and issue tracking.

Project - Cox Communications

- Contributed to sprint planning and collaborated with the team to align with project milestones.
- Executed test cases across various modules to ensure functional accuracy and system reliability.
- Participated in client discussions to gather requirements and improve test coverage.
- Created test data and performed functional and sanity testing to validate business workflows.
- Used TMS and JIRA for tracking test progress and managing defects.
- Verified and retested bugs, maintaining clear and detailed documentation for quality assurance.
- Supported User Acceptance Testing (UAT) by preparing data and assisting clients during execution.
- Developed user training materials and conducted knowledge transfer sessions for clients.
- Led triage calls to identify root causes and prioritize resolution of critical issues

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering
Malla Reddy College of Engineering for Women, Maisammaguda, Hyderabad
June 2017 – May 2021 | Aggregate: 78%

CERTIFICATION

Completed a certification course on "Playwright Python Automation Testing – From Zero to Expert" from Udemy.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge
