

Neelathi Jagadeesh Raju

C++ Software Engineer | Automotive Infotainment & QNX

Hyderabad, India

+91 9553906289 | jagadishraju34@gmail.com | LinkedIn

OBJECTIVE

C++ Software Engineer with 3 years of experience in automotive infotainment and Android development.

Strong expertise in C/C++, STL, multithreading, and HMI software development on QNX and Windows platforms. Experienced in developing, integrating, and optimizing HMI applications using QT, ALTIA, and XML while following Agile and V-Model development processes.

TECHNICAL SKILLS

Programming Languages:

C++, C, Java

C++ Concepts:

OOP, STL, Memory Management, Multithreading, Data Structures & Algorithms

Operating Systems:

QNX, Windows

Automotive & Embedded:

Infotainment Systems, HMI Development, Real-time Systems (RTOS basics)

UI & Frameworks:

QT Framework, ALTIA, XML

Tools:

IBM Rhapsody, SourceTree, Git, HMI Designer

WORK EXPERIENCE

People Tech Technology | Associate Software Engineer

May 2023 - Present

- Designed, developed, and maintained C++ applications for automotive infotainment systems on QNX and Windows platforms.
- Implemented Android HMI features using C++, QT, ALTIA, and XML, ensuring responsive UI performance and compliance with OEM requirements.
- Worked on inter-module communication and event handling, improving system stability and responsiveness.
- Applied object-oriented programming (OOP), STL containers, and multithreading concepts

to optimize application performance.

- Analyzed automotive requirements and converted them into detailed software design and implementation solutions.
- Collaborated with cross-functional teams (HMI designers, testers, system engineers) in Agile/Scrum environments to deliver production-ready software.
- Followed V-Model development lifecycle and automotive software quality standards.
- Used tools such as IBM Rhapsody, QT Framework, SourceTree, and HMI Designer for development and version control.

PROJECTS

INFO4 – Automotive Infotainment System (Professional Project)

- Developed and enhanced HMI features for automotive infotainment systems using C++ with ALTIA and XML.
- Integrated graphical UI components with application logic to ensure seamless user interaction.
- Optimized UI rendering and application performance for real-time responsiveness on QNX systems.
- Debugged and resolved integration and performance issues during development and testing phases.
- Coordinated with designers and QA teams to validate UI behavior against OEM specifications.

Trestle Jack – Academic Project

- Designed a mechanical lifting system using CATIA V5 and performed structural analysis using ANSYS as part of final year B.Tech project.

Academics

Bachelor of Technology (B.Tech)

S.R.K Institute of Technology, Vijayawada | 2019 – 2022

CGPA: 7.9 / 10

Diploma

DJR College of Engineering & Technology | 2016 – 2019

CGPA: 8.8 / 10

SSC

A.K.T.P.M.C High School | 2016

CGPA: 7.2 / 10
