

NITESH RAGHAVAN

SOFTWARE DEVELOPER

CONTACT

9108602047
nitesh.r@campusuve.com
Bengaluru, Karnataka

EDUCATION

Bachelor's degree
Reva University
2019

Master's degree
University Visveswaraya
2021

TECHNICAL SKILLS

Python, C, C++
Java, SQL
Debugging
Data Structures
Windows/Linux

SUMMARY

Experienced **Software Developer** with 4 years of expertise in **Python, C, and C++**. Proficient in software development, LTE/NR5G technologies, Nokia Optical Fibres Tech and Windows. Adept at data structures & algorithms, delivering scalable and optimized solutions. Skilled in debugging and tools like VS 2019, Apex, and QUTS. Passionate about problem-solving and software innovation.

PROFESSIONAL EXPERIENCE

Software Developer

Infinite Computer Solutions, Chennai | May, 2025 – present

Client - Nokia

Environment – Putty, Linux, C++, Python, C

Activities - Developing, debugging and testing.

Projects - Nokia 1830 PSS

Enhancement of Nokia 1830 PSS (Photonic Service Switch) product at the application layer, contributing to network element CLI development and SNMP MIB integration for optical networking hardware.

- Developed and delivered multiple CLI features for optical port interfaces, covering authentication, routing state management, and port-level attribute control across a wide range of line card types.
- Worked extensively with SNMP MIB attributes to integrate CLI commands with the underlying network management framework.
- Performed code refactoring to align implementations with existing codebase patterns, and resolved multiple defects across the CLI and MIB layers.
- Maintained CLI tree configuration files to register new commands across multiple shelf types and card variants.

Associate Software Engineer II

Capgemini India, Bengaluru | Feb, 2022 – Aug, 2024

Client - Qualcomm (01-04-2022 to 06-10-2024)

Environment - Windows, pycharm, visual studio 2019, VS code

Activities - Developing, debugging and execution of LTE & NR5G Analyzer tools and Log Parsing, DSA. TCP/IP Network Tools, Socket Programming.

Projects - QMCT Test Bench, IMS Media

Key Contributions:

- Developed the LTE/NR5G BLER Analyzer using Python and contributed to Qualcomm's QMCT Test-bench using C++ socket programming over TCP/IP to handle large datasets.
- Built optimized parsing algorithms for real-time log analysis, reducing development time and improving efficiency.
- Proficient in API development, object-oriented programming, and Python libraries, with hands-on experience in Visual Studio, VS Code, and PyCharm.
- Independently led projects from planning to delivery, including demos that generated significant interest for localized log analysis solutions.

Software Engineer

Ernst & Young LLP, Bengaluru | Nov,2020 – May,2021

Environment – IT Sector

Activities -- Execution and Debugging VAT Tools Stored Procedures on SQL Server Management System.

Key Contributions:

- Udemy Course on AngularJS Udemy
- Course on ReactJS, Python
- Worked as a Support IT
- Worked in a Manual Testing Team

Software Engineer

CSIR-4PI, NAL, Bengaluru | Nov,2018 – May,2019

Environment - Intern

Activities - XOR-XAND Neural Network Learning, SUMO traffic Simulation

Key Contributions:

- Learned Basics on Neural Networks and the workings of SUMO Traffic Simulation.
- Developed program for Learning Gates based on Back Propagational Neural
- Networks
- Python Programming to run a SUMO Traffic Simulation

EDUCATION

University Visvesvaraya College of Engineering | Bengaluru Karnataka India

Web Technologies , Master of Technology

Jun.2019 – Aug.2021

CGPA : 8.53

Projects : HUMAN COMPUTER INTERACTION ON NEURAL NETWORK WITH BACK PROPAGATION

Reva University | Bengaluru karnataka India

Computer Science and Engineering , Bachelor of Technology

Jun.2015 - May.2019

CGPA : 7.2

Project : Arcade Game using Python and image processing.
