SUMMARY

Systems Software Engineer with 2+ years of experience in C-based development for network operating systems, specialising in security protocols, authentication mechanisms, and SSH server configuration. Strong expertise in Linux system programming, PAM modules, and secure user management. Experienced in designing, implementing, and debugging low-level security features across ARM64 and x86 platforms.

PROFESSIONAL EXPERIENCE

Software Engineer – C Developer

IP Infusion Pvt. Ltd. | 2023 – Present

- Developed security and user management features in OcNOS using C
- Built CLI-driven configuration modules for authentication and SSH settings
- Integrated Linux PAM modules for password strength, history, and expiry enforcement
- Enhanced SSH server configuration, including KEX, MAC, and encryption algorithms
- Enabled both secure default configurations and legacy client compatibility
- Implemented password expiry, default password enforcement, and user lifecycle logic
- Automated cleanup of inactive users based on policy thresholds
- Debugged compiler issues, memory errors, and runtime defects across ARM64 and x86 platforms
- Worked with system-level files related to authentication and security configuration

EDUCATION

Bachelor's of Engineering - Computer Science & Engineering

2018-2022

Mangalore Institute of Technology & Engineering

CGPA: 8.77

Senior Secondary (12th)

2017-2018

Sri Mahaveera College, Moodbidri

Percentage: 85%

Secondary School (SSLC)

2015-2016

Babu Rajendra Prasad High School, Moodbidri

Percentage: 88%

SKILLS

Languages : C, Python, C++

OS & Systems : Linux, PAM, system authentication

Security : Password policies, SSH configuration

Tools : Git, Make, GCC

DevOps : Basic CI/build knowledge

KEY PROJECTS

Strong Password Policy & PAM Integration

- Integrated pam_pwquality and pam_pwhistory with OcNOS.
- Enforced password strength checks without storing plaintext passwords.

- Enabled CLI-based enable/disable of password policies.

Password Expiry & Default Password Enforcement

- Implemented password expiry based on user and role configuration.
- Prompted users to change default and expired passwords during login.
- Automated removal of users after prolonged password expiry.

SSH Server Management

- Added CLI support for configuring KEX, MAC, Encryption, and Hostkey algorithms.
- Enabled custom SSH algorithms while maintaining secure default.

ACHIEVEMENTS&ACTIVITIES

- Participated in **Codethon** at Mangalore Institute of Technology and Engineering.
- Participated in Josh Scholarship Test by ethnus 2020.
- Participated in **UiPath Academic Challenge** 2019.
