OBJECTIVE

Detail-oriented Computer Science Engineering graduate with hands-on experience in machine learning, computer vision, and hardware-interfacing systems. Seeking opportunities as Associate Software Engineer role in Real-Time Systems and Embedded Systems where I can apply my strong foundation in C, Python, and real-time data processing to build reliable, low-latency software solutions. Committed to continuous learning and eager to contribute to performance-critical embedded projects.

EDUCATION

Anurag University, Hyderabad, B. Tech CSE 2021 – 2025

- GPA: 8.0/10.0

Sri Chaitanya Junior College, Hyderabad, Intermediate-MPC 2019 – 2021

- Per.: 74 percent

Oxford Grammar School, Hyderabad, High School 2019

- GPA: 8/10

INTERNSHIP

Machine Learning Intern, Cognifyz Technologies – Hyderabad Apr 2024 – May 2024

- Developed a supervised ML model to predict aggregate ratings from structured datasets, applying data preprocessing and optimization techniques relevant to embedded sensor data pipelines.
- Built a real-time recommendation engine based on user preferences, applying decision-making logic similar to event-driven programming used in embedded systems.
- Conducted geographical analysis on large datasets, improving skills in data-driven system design and efficient computation for resource-constrained environments.

PROJECTS

Medvision | Multi-Model AI Chat-bot for Enhanced Medical Diagnosis

- Medvision is an AI-powered chat-bot designed to assist in medical diagnosis by analyzing text descriptions, medical images, and voice inputs. Using Large Language Models (LLMs) like GPT and BERT, along with image recognition, it provides accurate diagnoses and recommendations.

Intelligent Classroom | Audio-to-Notes Summarization System

- This System converts classroom audio into concise, structured notes. By leveraging advanced speech recognition, Natural Language Processing and machine learning, the system filters out content, focusing on core subject matter.

Iris Mouse Controller

- Iris Mouse Controller: ML model to control the cursor using iris movement. It is developed by using Python. Mediapipe, Pyautogui, OpenCV are used in this system. Selection feature can be used by blink of an eye.

SKILLS

Languages: C | Python | Core-Java | HTML | CSS | BOOTSTRAP | SQL | DBMS

Technologies: Machine Learning | Artificial Intelligence

Tools: Google Colab | VS Code | Jupyter | AWS

Soft Skills: Teamwork | Communication | Leadership | Adaptive

CERTIFICATIONS

AWS Academy – Cloud Foundation

CISCO – Networking Essentials

Java Full Stack (Wipro)

Enterprise-grade AI (IBM)

Python Data Structures and Algorithms (Infosys)

HTML, CSS and JavaScript (Infosys)

ACCOMPLISHMENTS

Member of NGO – actively contributing to community and social impact initiatives.

Runner-up in Tech-Hack 3.0, recognized for innovative AI-based solutions.

Actively participated in workshops and competitions focused on emerging technologies.
