

SAKETH RAMOJJALA

Contact: +918688913579/E-Mail:sakethkashyap9@gmail.com

Driven and detail-oriented professional seeking an entry-level role to leverage advanced Technical and analytical capabilities. Passionate about continuous learning, innovation, and making meaningful contributions to organizational excellence.

PROFILE - SUMMARY

- Problem solving oriented approach ways with technically skilled on technologies with Java full stack, Machine learning, Linux commands and cloud computing models
- Good knowledge on SQL Queries with CRUD Operations and Operating System Concepts
- Proficient in Leveraging adiverse skill set and developing innovative Python Programming, ML Algorithms and web development
- Attended Certificate of Participation on Human Resource Skills Workshop at Tareeq Global Solutions Pvt.Ltd
- Published an Research Article in **International Journal of Information Technology** from **Springer** with title called **EdgeGuardIA: An adaptive in-network machine learning framework for real-time IoT Gateway Security**

KNOWLEDGE - PURVIEW

- Machine Learning Algorithms
- AI Tools (Scikit-learn, Py-torch)
- Core Java and Advanced Java(OOPS Concepts, Exception Handling)
- Python Programming
- SDLC Concepts, PDLC Concepts, React Js
- HTML5, CSS, JS, Postgre-SQL
- **Operating System Concepts**
- Linux Commands and SQL CRUD operations
- Cloud Computing models , **Troubleshooting**

PROJECTS UNDER -TAKEN

- **Consumer Loyalty Aware Ideal Multi-server Design (2022):** The "Consumer Loyalty Aware Ideal Multi-server Design" aims to optimize cloud service platforms for maximum profit ability while considering consumer satisfaction. It takes into account service quality, consumer satisfaction, leasing prices, and energy consumption to find the best configuration for cloud service providers.
- **Network Intrusion Detection System for DDOS Attacks in ICS Using Deep auto –encoders (2023):** A Network Intrusion Detection System (NIDS) for DDoS attacks in Industrial Control Systems (ICS) using deep auto-encoders leverages unsupervised learning to detect anomalies in network flow data.This approach does not require prior knowledge of the network topology and provides high detection rates with low false alarms
- **EdgeGuardia an Intelligent Low-Latency in Network Threat Detection Framework for IOT Gateways (2025):** EdgeGuardia is an intelligent, low-latency, edge-based threat detection framework for securing IoT networks, utilizing programmable P4 gateways and machine learning to analyze traffic and block threats directly.

ACADEMIC-DETAILS

- **2026:** Pursuing M.Tech (Data Science), Kakatiya Institute of Technology and Sciences, Warangal.
- **2023:**B.Tech (Computer Science and Engineering), Jyothishmathi Institute of Technology and Sciences, Karimnagar with 70%.
- **2019:** Intermediate from Sri Gayathri Junior College, Karimnagar with 72%.
- **2017:** SSC from Paramitha High School, Karimnagar with 88%.

CERTIFICATIONS

- **Course Completion Certificate from Spiders(Hyd):**Java Full-Stack Course
- **Course Completion Certificate from Edu-reka:** Dev-Ops Certification
- **Communication Skills Completion Certificate:** Magic Bus India Foundation

PERSONAL-DETAILS

Date of Birth: 09th November 2003.
Address: Karimnagar - 505001, India.
Languages Known: English, Telugu.
