PROFILE SUMMARY

Information Technology graduate with experience in full-stack web development, AI integration, and cloud services. Delivered scalable solutions and interactive applications through freelance and internship roles.

EDUCATION

MVSR Engineering college, Hyderabad, Telangana

2021- 2025

B.E - InformationTechnology

EXPERIENCE

Kloud Codes - Trainee Intern

March 2025-May 2025

- Completed a 2-month internship at Kloud Codes, contributing to the LMS Development Team with a focus on AI integration.
- Collaborated on designing and implementing AI-driven features to enhance user learning experience and platform efficiency.
- Gained hands-on experience in full-stack development and integration of AI models into LMS workflows.

Freelancer Front-End Developer

April 2023-August 2025

- Designed and developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and modern frameworks, ensuring optimal performance across devices and browsers.
 - Collaborated with clients to understand project requirements, delivering tailored solutions that enhanced user engagement and improved functionality.
-

PROJECTS

Vehicle Number Plate Recognition Systems(OpenCV,Python,TensorFlow,Yolo v5,CNN)

- Developed an automated data verification system for vehicle number plates using deep learning and image processing.
- Performed data extraction, segmentation, and validation from complex inputs to ensure accuracy, similar to validating candidate documents or records in a verification workflow.

Gold & Silver Resale Web Application(Googlecolab,Python,Machine Learning, Scikit-Learn,Linear Regression Model)

- Built a secure platform for verifying and managing high-value transactions, ensuring authenticity of gold and silver items submitted by users.
- Designed admin approval systems to flag inconsistencies or suspicious entries, demonstrating capability in identifying discrepancies and inconsistencies in data.

Railway Station Navigation System(React,Node.js,Typescript)

- Developed a platform for railway stations, focusing on efficient organization and retrieval of complex

spatial information for users.

- Enabled intuitive access to critical facility data (platforms, ticket counters, restrooms).

TECHNICAL SKILLS

- Languages: Python, Java
- Frontend Development: HTML5, CSS3
- Backend Development: Flask, REST API's
- Database Management: MySQL, RDBMS
- DevOps Tools: Jenkins (CI/CD), Docker
- Version Control: Git | Development Methodologies: DevOps, Agile Methodologies.
- Tools: PowerBI, Ms Excel, AWS basic service.
