

Rajesh

Contact No: +91 8897042606

E-Mail: rajrajeshp2196@gmail.com

Career Objective:-

Keenly interested in challenging and creative assignments, which will enable me to sharpen my skills and make me competent enough to excel in the field of software design and development of software systems while utilizing my experience in developing application software, Special interest in Object Oriented Techniques.

Professional Summary:-

- ❖ Having **5+ Years** Hands on experience in developing Windows applications using with **C, C++, C++11**.
- ❖ Having experience in using **C++14, C++11** features technical concepts like type castings, smart pointers, Pointer/Ref types, Virtual destructors, volatile and auto keywords.
- ❖ Having knowledge of application development methodologies like **Object Oriented Concepts [OOPs]**.
- ❖ Good Knowledge in writing OOPS concepts like **Abstraction, Inheritance, Polymorphisms**.
- ❖ Having Knowledge in writing Generic Code using the **STL Containers like Vector, List, Map, data structures** and **Algorithms**.
- ❖ Having knowledge on implementing basics of **design patterns**.
- ❖ Good Debugging **and analyzing skills**

Education Qualification:-

- ❖ **B.Tech(EEE)** from Guru Nanak Institute of Technical Campus, Ibrahimpatnam (**JNTUH**).
- ❖ **Diploma (EEE)** from Govt Model Residential polytechnic, Bhadrachalam (**State Board of Technical Education and Training**).
- ❖ **S.S.C** from Saikrupa Vidya Mandiram High School (**State Board of Secondary Education**).

Career Scan:

- ❖ Company Name : Arkin Techno Pvt Ltd
- ❖ Location : Pune
- ❖ Designation : Software Engineer.
- ❖ Duration : Since Aug 2020 to Jun 2022.
- ❖ Company Name : Harman Connected Service Corporation India Pvt Ltd
- ❖ Duration : Since June 2022 to mar 2023.
- ❖ Location : Bangalore
- ❖ Designation : Software Engineer.
- ❖ Company Name : Vzure Software Netware Solutions
- ❖ Duration : Since Api 2023 –Present.
- ❖ Location : Bangalore
- ❖ Designation : Software Engineer

Technical Skills:	❖ Programming Languages	: C, C++.
	❖ Database	: Microsoft SQL Server.
	❖ Development Tool	: Visual Studio.
	❖ Source Control Tools	: Git.

Project :- Self-checkouts

Description:

Self-checkouts, also known as assisted checkouts or self-service checkouts, are machines that provide a mechanism for customers to complete their own transaction from a retailer without needing a traditional staffed checkout. When using SCOs, customers scan item barcodes before paying for their total shop without needing one-to-one staff assistance. Self-checkouts are used mainly in supermarkets, although they are not uncommon in department or convenience stores. Most self-checkout areas are supervised by at least one staff member, often assisting customer's process transactions, correcting prices, or otherwise providing service.

In self-checkout systems, the customer is typically required to:

- ❖ Scan product barcodes where these exist
- ❖ Weigh products (such as fresh produce) without barcodes and select the variety on a touch screen display.

Responsibilities:

- ❖ Fixing Bugs in application source code
- ❖ Working on user stories
- ❖ Working on enhancement user stories using object-oriented concepts
- ❖ Debugging the existing legacy code for regression analysis and bug fixes
- ❖ Writing unit test cases.
- ❖ Writing code using oops concepts.

Project:- Advanced MES (Manufacturing execution system)

Description:

Manufacturing execution systems deliver information that enables the optimization of production activities from order launch to finished goods. Using current and accurate data, MES guides, initiates, responds to and reports on plant activities as

they occur. The resulting rapid response to changing conditions, coupled with a focus on reducing nonvalue-added activities, drives effective plant operations and processes. MES provides mission-critical information about production activities across the enterprise and supply chain via bidirectional communications.

Responsibilities:

- ❖ Fixing Bugs in application source code
- ❖ Working on user stories
- ❖ Working on enhancement user stories using object-oriented concepts
- ❖ Debugging the existing legacy code for regression analysis and bug fixes
- ❖ Writing unit test cases.
- ❖ Writing code using oops concepts.

Project:- Electronic Health Records (EHR)

Description:

An **Electronic Health Records (EHR) Sharing and Reporting System** is the systematized collection of patient and population electronically stored medical information in a digital format. Records are shared through network-connected, enterprise-wide information systems or other information networks and exchanges. It allows for the physicians to share Patient Health Records with other physicians in the system based on approval from the concerned patients. Physicians receive only selected information from the referring doctor and hospital medical records.

Responsibilities:

- ❖ Fixing Bugs in application source code
- ❖ Working on user stories
- ❖ Working on enhancement user stories using object-oriented concepts
- ❖ Debugging the existing legacy code for regression analysis and bug fixes
- ❖ Writing unit test cases.
