

KODAM SANATH KUMAR

Mobile: +91 8074969914

Email: kodamsanathkumar9@gmail.com

Objective:

To be in a position in a result-oriented company that seeks an ambitious and career conscious where acquired knowledge and skills gained during my professional experience will be utilized towards continuous growth and development of the organization

Professional Experience:

- Overall, 3.7 years of experience in software development with strong expertise in **C/C++ and SQL**.
- Around 2+ years of hands-on experience in **Qt framework**, including **Qt Widgets (C++/.ui)** and **Qt Quick (QML/JavaScript)**. Hands-on experience in Qt Creator, with practical development of Qt Widgets (C++/.ui) and Qt Quick applications (QML/JavaScript).
- Experience in developing **cross-platform desktop and embedded UI applications** using Qt. Experience in building cross-platform desktop and embedded UI applications using Qt framework.
- Strong understanding of **Object-Oriented Programming (OOP)** principles. Domain knowledge in Banking & Financial applications, including application support and operations.
- Hands-on experience in **signals & slots, event handling, layouts, and QML-C++ integration**.
- Developed and enhanced UI features, and resolved defects to improve application performance and stability.
- Experience working on **Banking & Financial applications**, including development and production support.
- Proficient in **Git and SVN** for version control and collaborative development.

Tools & Technology:

- Programming Languages: C, C++, SQL, PL/SQL
- Technologies/Frameworks: Qt Creator, QML, Android Application Development, Desktop Application Development
- Operating Systems: Linux, Unix, Windows
- Database: Oracle 12c
- Development Tools: Git, GitHub, SVN, PuTTY, Cygwin, Oracle Tools
- Platforms/Environments: Linux, Unix, Windows

Educational Qualification:

- Completed B-Tech (CSE) from Chaitanya Institute of Technology and Science in 2022 with an aggregate of 8.0 CGPA.
- Intermediate from Sri Vikas Junior College in 2018 with 78.2%.
- SSC from Board of Secondary Education Sharada High School in 2016 with an aggregate of 9.0 CGPA.

Professional Experience:

Project 1:

- **Project Name:** Money Out (DDRV).
- **Company:** Empower

Project Description:

Money for retirement time, tax savings. They are opening the retirement account So, the Empower will keeping the record / transaction data whatever the business flow happening in the retirement flow. We just keep the records for entire flow. That what empower is doing. We don't to pay any tax for that particular portion of our salary. Focus areas or business terms. PPTS || Beneficiary || Alternative payee PPTS nothing but owner of the plan or employee of US organization. Employer has provided the plans to PPTS we can choose n number of plans provide by it. And we can choose that plan to invest into that retirement account.

DDRV is a disbursement drivers process/rebuild. Through autosys, PERL controls script run and monitor the entire jobs, DDRV processes/rebuilds disbursements. And will finish only after all DDRV in BATCH jobs have completed successfully. Each job stream processes or rebuilds the disbursements that correspond to its stream number and select_type, depending on the job type (see below). Individuals are selected for processing by a particular stream by taking the $\text{mod}(\text{ind_id}, \text{total_streams}) + 1$ and checking that number against the stream number.

Project 2:

- **Project Name:** BMCL (Batch message clearance).
- **Company:** Empower

Project Description:

This process will delete old messages in batch msg and batch msg receiver tables and/or close messages in batch msg. A series of actions will be done based on the age of the messages and whether or not the messages have been cleared. Whatever the messages logged from different modules that can be cleared by using this module.

Autosys Job Description:

This job will be scheduled from autosys in daily each bus_cal WORK day. This process will delete old messages, A series of actions will be done based on the age of the messages and whether or not the messages have been cleared.

Project 3:

- **Project Name:** Hidden Warangal | Android Application

Project Description:

This application was developed to showcase hidden and less-known tourist locations in Warangal. The app provides users with detailed information about various attractions, including descriptions, images, and location details. Multiple activities and fragments were designed to ensure smooth navigation across the application. The system also includes search functionality and category-based filtering, allowing users to easily explore different places based on their interests. Structured data was managed for storing location details and images, and responsive UI design principles were applied to provide a user-friendly experience across different Android devices.

Project 4:

- **Project Name:** Trading Desktop Application | C++, Qt, MySQL
- **Company:** Empower

Project Description:

This application was developed as a desktop-based trading system to manage trading activities and monitor transactions efficiently. The system includes a dashboard and transaction management features that allow users to perform buy and sell operations. The application integrates a MySQL database using the Qt SQL module to store and manage trading data. CRUD operations were implemented for handling transaction records, and features for portfolio tracking and profit/loss calculations were designed to help users analyze their trading performance. The UI was optimized to ensure better performance and smooth interaction, while SQL queries were structured for efficient data handling.

Tech Stack: C++, Qt, MySQL, SQL

Roles & Responsibilities:

- Analysis of the Specifications provided by the clients.
- Involved in meeting with functional team to understand the functional specification documents.
- Debugging and finding errors.
- Involved in the bug fixes as well as enhancements to the existing project.
- Developing the application and do the unit testing.
- Involved in the bug fixes as well as enhancements to the existing project.
- Understanding the design requirements specification algorithms.

DECLARATION

The above said information are true to the best of my knowledge, and hope this will be a brief reference for you to give me an opportunity to prove myself to serve your well-directed needs.
