

### **Objective:-**

Passionate and detail-oriented QA Engineer with 6 months of hands-on internship experience in manual and automation testing. Skilled in writing test cases, identifying defects, and ensuring software quality standards. Ready to contribute to a dynamic QA team with strong analytical and problem-solving abilities.

### **Project Summary:-**

- Having 6 months of experience in the IT industry as intern, supporting the QA team during 24/7 test cycles.
- Designed and executed **comprehensive test cases** for functional, UI, and integration testing in the **test environment**.
- Maintained and updated test cases in **Excel**, ensuring traceability to requirements.
- Gained hands-on experience with **Postman** for API testing in the **test environment**.
- Performed GET, POST, PUT, DELETE requests, validating status codes, headers, and response bodies.
- Tested authentication methods like Bearer Tokens and API Keys.
- Created collections and environments for API testing efficiency.
- Coordinated with developers to **verify bug fixes and retest in the test environment**.
- **Quick learning abilities**, adapting to QA tools like Postman, and basic SQL.

### **Skills:-**

- Programming Language:- Python, C, Html, CSS
- Operating Systems:- Linux, windows
- Tools:- Postman, PowerBI Git.
- Database:- My SQL

### **Certification:-**

- **IOT:-** By NPTEL
- **E-business:-** By NPTEL
- **Leadership and team effectiveness:-** By NPTEL

### **Academic:-**

- Bachelor of Engineering (B-Tech-CSE)(73%) from Vignan University, From Guntur.
- Diploma (EEE-77%) From Chalapathi Institute of Technology, Guntur.
- Oxford School(SSC-8.5 CGPA)

### **Academic Projects:-**

PLANT DISEASE DETECTION USING CNN Problem:

Automated deep learning systems are essential for accurate, efficient crop disease detection, reducing time and cost for farmers compared to traditional, error-prone visual inspections.

- Leaf detection is a field of study under the image recognition field of computer vision. Recognizing leaves is of utmost importance in biodiversity conservation
- The major project, detection of diseases in crops, is also another important milestone in conserving not just biodiversity but also saving crops from disease spread

- The CNN has aided the process of detection, by the monitoring of some basic features of leaves and then comparing the values obtained with the available data set.

### **WORKING EXPERIENCE:-**

Working as a QA Engineer at Vivid minds and Technologies, Hyderabad, from January 2025 to Till Now.

### **Internship Projects:-**

Title: QA Engineer

(Jan6 2025 to Till Now)

Client: Quixy

### **Responsibilities:-**

- Developed and executed test cases, test scenarios, and test data based on functional requirements.
- Performed various types of testing, including Functional Testing, Regression Testing, Smoke Testing, and Sanity Testing.
- Conducted manual testing of web applications and mobile applications to identify bugs and usability issues.
- Logged and tracked defects using **JIRA**; ensured proper communication with developers for issue resolution.
- Executed **API Testing** using **Postman** by validating request-response formats, status codes, and data integrity.
- Learned and followed **SDLC and STLC** best practices throughout the internship.
- Followed **bug lifecycle management** practices: Reporting, Assigning, Retesting, and Closing bugs effectively.
- 

### **Personal information:-**

Date of Birth:-24-04-2003

Father name :-P. Srinivasa Rao.

Mother name :-P. Radhika.

Permanent address :- D no:86-3-506,Ramaiah Nagar, Chuttugunta ,Guntur.
